PROFESSIONAL SUMMARY

Accomplished academic and researcher with a Ph.D. in Finance (2018) and over a decade of teaching experience at the university level. Combines a strong foundation in business management with advanced proficiency in quantitative analysis, Python, R, and machine learning tools. Passionate about data-driven research and interdisciplinary learning.

CORE TEACHING SUBJECTS

Finance & Accounting

- Financial Management
- Accounting for Managers
- Cost Accounting
- Risk Management

Management & Strategy

- Strategic Management
- Operations Management
- Entrepreneurship
- Management Information Systems

Economics & Law

- Economics
- Corporate Laws
- Quantitative Techniques

RESEARCH & ACADEMIC INTERESTS

Dr. Parmar's research interests lie at the intersection of finance and data science. He actively applies machine learning and statistical modelling techniques using Python and R to problems in financial markets, investment analysis, and quantitative finance. His expertise spans predictive modelling, time series analysis, and stock market technical analysis.

RESEARCH PUBLICATIONS

Journal Articles

- Published 5 research papers in reputed National and International journals covering areas of finance, quantitative methods, and business management.

Book Contributions

- Authored 1 chapter in an edited book, contributing scholarly insights to the field of business and finance.

CONFERENCES & SEMINARS

Actively participated in and presented at multiple National and International conferences and seminars, contributing to academic discourse in the areas of finance, management, and data-driven research.

PROFESSIONAL TRAINING

Completed hands-on training in the fields of Machine Learning and Artificial Intelligence, gaining practical expertise in building and deploying predictive models and AI-driven solutions.
